VOLUME 30, PART II

SUBJECT INDEX

A

Absorption.

Some Results of Freezing-and-Thawing Tests Made with Clay Face Brick. L. A. Palmer and J. V. Hall, 767. Discussion, 781.

Accelerated Tests.

Development of Zinc-Base Die-Casting Alloys. D. L. Colwell, 473. Discussion, 490.

Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.

Acid Number.

A Method for the Determination of the True Acid Value of Oils, Varnishes, Liquid Driers and Soaps. E. W. Diener and S. Werthan, 924.

Aggregates.

Flow of Concrete Under Sustained Compressive Stress. R. E. Davis and H. E. Davis, 707.

Tests of Plain and Reinforced Haydite Concrete. F. E. Richart and V. P. Jensen. 674. Discussion, 694.

Variations of Compressive Strength of Concrete Within the Water-Cement Ratio Law. Ira L. Collier, 731. Discussion, 742.

Volume Change of Concrete. C. H. Scholer and E. R. Dawley, 751.

Aircraft Materials.

Symposium on Aircraft Materials:

Introduction. Horace C. Knerr, 26.

Ferrous Metals Used in Airplane Construction. J. B. Johnson, 28.

Structural and Engineering Light Alloys for Aircraft. R. L. Templin, F. V. Hartman and E. C. Hartmann, 34.

The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41.

Strength and Characteristics of Wood Used in Aircraft Construction. G. W. Trayer, 48.

Aeronautical Textiles. W. E. Emley, 58.

Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61.

Notes on Aircraft Finishes. H. A. Gardner, 68.

Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77.

Aircraft Materials (*Continued*):

Materials of Construction in Aircraft Engines. R. R. Moore, 88.
Failures of Aircraft Engine Parts and Causes Thereof. Thomas T. Neill, 99.
Specifications and Materials Control. H. A. Backus, 109.
Mechanical Testing of Aircraft Materials. J. B. Johnson, 119.
Metal Joints in Aircraft Construction. T. Watson Downes, 127.
Procedure Control in Aircraft Welding. H. L. Whittemore, John J. Crowe and H. H. Moss, 140.
X-ray Testing of Aircraft Materials. Ancel St. John, 147.
Photo-Elastic Studies of Aircraft Parts. T. H. Frost, 150.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154.
Discussion on Aircraft Materials, 171.

Alloys.

Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77. Discussion, 192.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.
Development of Zinc-Base Die-Casting Alloys. D. L. Colwell, 473. Discussion, 490.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
Silver Solders. R. H. Leach, 493. Discussion, 509.
Specifications and Materials Control. H. A. Backus, 109. Discussion, 200.
Specimens for Torsion Tests of Metals. R. L. Templin and R. L. Moore, 534. Discussion, 544.
Structural and Engineering Light Alloys for Aircraft. R. L. Templin, F. V. Hartman and E. C. Hartmann, 34. Discussion, 171.
The Effect of Additions of Small Percentages of Nickel to a Copper-Tin Bronze. Clair Upthegrove, G. Wilson and F. N. Rhines, 512. Discussion, 520.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.
The Significance of Hardness Values for Some Copper-Zinc Alloys. C. H. Davis and E. L. Munson, 522. Discussion, 529.

Alloy Steel.

Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.
Specifications and Materials Control. H. A. Backus, 109. Discussion, 200.
The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41. Discussion, 171.

Alloy Steel (*Continued*):
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.
The New Manganese Alloy Steels. E. E. Thum, 215. Discussion, 237.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Aluminum.
Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77. Discussion, 192.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
Specifications and Materials Control. H. A. Backus, 109. Discussion, 200.
Specimens for Torsion Tests of Metals. R. L. Templin and R. L. Moore, 534. Discussion, 544.
Structural and Engineering Light Alloys for Aircraft. R. L. Templin, F. V. Hartman and E. C. Hartmann, 34. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.

Apparatus.
See **Testing Apparatus.**

Atmospheric Corrosion.
See **Corrosion.**

Austenitic Alloys.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.

B

Balloon Cloth.
Aeronautical Textiles. W. E. Emley, 58.

Beams.
The Comparative Strength of Short Wooden Beams With and Without Overhand Beyond the Supports. F. J. Converse, 1006.

Belting.
Service Tests on Rubber Belts. E. G. Kimmich, 957. Discussion, 964.
Stretch in Rubber Transmission Belting. C. W. Staacke, 944.
A Study of the Performance Characteristics of a 4-inch 4-ply Rubber Transmission Belt. J. E. Skane, 928. Discussion, 941.

Bend Testing.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.
Mechanical Testing of Aircraft Materials. J. B. Johnson, 119. Discussion, 200.

Bond.
Tests of Plain and Reinforced Haydite Concrete. F. E. Richart and V. P. Jensen, 674. Discussion, 694.

Brass.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
The Significance of Hardness Values for Some Copper-Zinc Alloys. C. H. Davis and E. L. Munson, 522. Discussion, 529.

Brazing.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
Silver Solders. R. H. Leach, 493. Discussion, 509.

Brick.
Some Results of Freezing-and-Thawing Tests Made with Clay Face Brick. L. A. Palmer and J. V. Hall, 767. Discussion, 781.

Brightness.
See **Hiding Power.**

Brinell Hardness.
See **Hardness Testing.**

Bronze.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
The Effect of Additions of Small Percentages of Nickel to a Copper-Tin Bronze. Clair Upthegrove, G. Wilson and F. N. Rhines, 512. Discussion, 520.

Building Tile.
See **Tile.**

C

Cable.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.
Investigation of Cold-Drawn Bridge Wire. L. S. Moisseiff, 313. Discussion, 348.
Rosin in Cable Impregnating Compounds. J. P. Millwood, 828. Discussion, 849.

Cadmium Plating.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.

Castings.
Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77. Discussion, 192.
Development of Zinc-Base Die-Casting Alloys. D. L. Colwell, 473. Discussion, 490.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.

Cast Iron.
Ferrous Metals Used in Airplane Construction. J. B. Johnson, 28. Discussion, 171.
The Effect of Under-Stressing on Cast Iron and Open-Hearth Iron. J. B. Kommers, 368. Discussion, 382.

Cements.
Discussion on Mortar Specimens, 615.
Further Studies on the Workability of Concrete. W. F. Purrington and H. C. Loring, 654. Discussion, 668.
Strength and Resistance to Sulfate Waters of Concrete Cured in Water Vapor at Temperatures Between 100 and 350° F. Dalton G. Miller, 636.
A Study of Fourteen Brands of Standard Portland Cements and Four Early-Strength Cements. C. H. Scholer and L. H. Koenitzer, 581. Discussion, 594.
The Rate of Hydration of Cement Clinker: Part II—Portland Cement at Nine and Twelve Months; Part III—Three Minerals Found in Portland Cement. F. O. Anderegg and D. S. Hubbell, 572. Discussion, 579.
The Relation Between the Strengths of Cements Developed by Mortar Specimens and Concrete Specimens. J. R. Dwyer and P. H. Bates, 598. Discussion, 615.
Variations of Compressive Strength of Concrete Within the Water-Cement Ratio Law. Ira L. Collier, 731. Discussion, 742.
Volume Change of Concrete. C. H. Scholer and E. R. Dawley, 751.

Chromium Steel.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
A Note on Fatigue Tests of Nitrided Steel. N. L. Mochel, 406.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.
The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Clay Products.
Some Results of Freezing-and-Thawing Tests Made with Clay Face Brick. L. A. Palmer and J. V. Hall, 767. Discussion, 781.
Strength Tests on Roof Tiles. Norman W. Kelch, 783.

Coatings.
See **Protective Coatings.**

Color.
Color and Its Measurement. Edgar Marburg Lecture. C. E. Kenneth Mees, 9.

Compression Testing.
Flow of Concrete Under Sustained Compressive Stress. R. E. Davis and H. E. Davis, 707.
Some Results of Freezing-and-Thawing Tests Made with Clay Face Brick. L. A. Palmer and J. V. Hall, 767. Discussion, 781.
Strength and Resistance to Sulfate Waters of Concrete Cured in Water Vapor at Temperatures Between 100 and 350° F. Dalton G. Miller, 636.
Strength Tests on Roof Tiles. Norman W. Kelch, 783.
Tests of Plain and Reinforced Haydite Concrete. F. E. Richart and V. P. Jensen, 674. Discussion, 694.

Compressing Testing (*Continued*):
The Relation Between the Strengths of Cements Developed by Mortar Specimens and Concrete Specimens. J. R. Dwyer and P. H. Bates, 598. Discussion, 615.
Variations of Compressive Strength of Concrete Within the Water-Cement Ratio Law. Ira L. Collier, 731. Discussion, 742.

Concrete.
Flow of Concrete Under Sustained Compressive Stress. R. E. Davis and H. E. Davis, 707.
Further Studies on the Workability of Concrete. W. F. Purrington and H. C. Loring, 654. Discussion, 668.
A. Study of Fourteen Brands of Standard Portland Cements and Four Early-Strength Cements. C. H. Scholer and L. H. Koenitzer, 581. Discussion, 594.
Strength and Resistance to Sulfate Waters of Concrete Cured in Water Vapor at Temperatures Between 100 and 350° F. Dalton G. Miller, 636.
Tests of Plain and Reinforced Haydite Concrete. F. E. Richart and V. P. Jensen, 674. Discussion, 694.
The Relation Between the Strengths of Cements Developed by Mortar Specimens and Concrete Specimens. J. R. Dwyer and P. H. Bates, 598. Discussion, 615.
Variations of Compressive Strength of Concrete Within the Water-Cement Ratio Law. Ira L. Collier, 731. Discussion, 742.
Volume Change of Concrete. C. H. Scholer and E. R. Dawley, 751.

Condenser Paper.
The Testing of Condenser Paper. F. L. Roman, 1012.

Conducting Paths.
The Testing of Condenser Paper. F. L. Roman, 1012.

Consistency.
Flow of Concrete Under Sustained Compressive Stress. R. E. Davis and H. E. Davis, 707.
Further Studies on the Workability of Concrete. W. F. Purrington and H. C. Loring, 654. Discussion, 668.
Variations of Compressive Strength of Concrete Within the Water-Cement Ratio Law. Ira L. Collier, 731. Discussion, 742.

Copper.
The Effect of Additions of Small Percentages of Nickel to a Copper-Tin Bronze. Clair Upthegrove, G. Wilson and F. N. Rhines, 512. Discussion, 520.
The Significance of Hardness Values for Some Copper-Zinc Alloys. C. H. Davis and E. L. Munson, 522. Discussion, 529.

Corrosion.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.
Paint Failure Diagnosis. Robert Job, 871.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.

Corrosion (*Continued*):
A Study of the Error of Averages and Its Application to Corrosion Tests. C. H. Humes, R. F. Passano and Anson Hayes, 448.
The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.

Cotton Fabric.
Aeronautical Textiles. W. E. Emley, 58.
Thermal Transmission of Fabrics. Ephraim Freedman, 1025. Discussion, 1035.

Curing.
Strength and Resistance to Sulfate Waters of Concrete Cured in Water Vapor at Temperatures Between 100 and 350° F. Dalton G. Miller, 636.

Cyclic Stress.
See **Fatigue Testing.**

D

Data, Analysis of.
A Study of the Error of Averages and Its Application to Corrosion Tests. C. H. Humes, R. F. Passano and Anson Hayes, 448.

Die Castings.
Development of Zinc-Base Die-Casting Alloys. D. L. Colwell, 473. Discussion, 490.

Dielectric Strength.
The Testing of Condenser Paper. F. L. Roman, 1012.

Disinfectants.
The Use of Rosin in Insecticides and Disinfectants. R. C. Roark, 832. Discussion, 850.

Distillation.
Motor Performance as Determined by Fuel Volatility. George Granger Brown, 979. Discussion, 1005.

Dopes, Airplane.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.

Duralumin.
Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77. Discussion, 192.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
Specifications and Materials Control. H. A. Backus, 109. Discussion, 200.
Structural and Engineering Light Alloys for Aircraft. R. L. Templin, F. V. Hartman and E. C. Hartmann, 34. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.

E

Elasticity.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.

Elastic Limit.
See **Tension Testing.**

Electrical Testing.
A Magnetic Strain Gage. J. Paul Shamberger, 1041. Discussion, 1048.
The Unbalanced Alternating Current Bridge for Magnetic Analysis. W. B. Kouwenhoven and A. C. Seletzky, 298. Discussion, 312.

Elongation.
See **Tension Testing.**

Endurance Testing.
See **Fatigue Testing.**

Esters.
Rosin in the Manufacture of Rosin Esters. Stephen Babcock, 795. Discussion, 842.

Expansion of Concrete.
See **Volume Change.**

Exposure Tests.
See **Corrosion; Weathering.**

F

Fabrics.
See **Textile Materials.**

Fatigue Testing.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.
Fatigue Testing of Fillet Welds. R. E. Peterson and C. H. Jennings, 384. Discussion, 394.
Investigation of Cold-Drawn Bridge Wire. L. S. Moisseiff, 313. Discussion, 348.
A Note on Fatigue Tests of Nitrided Steel. N. L. Mochel, 406.
Service Tests on Rubber Belts. E. G. Kimmich, 957. Discussion, 964.
The Effect of Under-Stressing on Cast Iron and Open-Hearth Iron. J. B. Kommers, 368. Discussion, 382.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.

Flexing Test.
Laboratory Flexing Tests as an Aid in Investigating the Pneumatic Tire Carcass. H. A. Depew and H. C. Jones, 965. Discussion, 976.

Flexure Testing.
Some Results of Freezing-and-Thawing Tests Made with Clay Face Brick. L. A. Palmer and J. V. Hall, 767. Discussion, 781.

Flow.
Flow of Concrete Under Sustained Compressive Stress. R. E. Davis and H. E. Davis, 707.
Further Studies on the Workability of Concrete. W. F. Purrington and H. C. Loring, 654. Discussion, 668.

Fly Paper.
The Use of Rosin in Insecticides and Disinfectants. R. C. Roark, 832. Discussion, 850.

Forgings.
Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77. Disussion, 192.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.

Freezing Tests.
Some Results of Freezing-and-Thawing Tests Made with Clay Face Brick. L. A. Palmer and J. V. Hall, 767. Discussion, 781.

Fuel.
See **Gasoline.**

G

Gages.
A Magnetic Strain Gage. J. Paul Shamberger, 1041. Discussion, 1048.

Galvanizing.
See also **Zinc.**
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.

Gas Cell Fabric.
Aeronautical Textiles. W. E. Emley, 58.

Gasoline.
Motor Performance as Determined by Fuel Volatility. George Granger Brown, 979. Discussion, 1005.

Gloss.
Gloss and Its Quantitative Measurement. E. D. Ries and C. B. Gilbert, 911. Discussion, 923.

Gravel.
See **Aggregates.**

H

Hardness Testing.
Hardness by Mutual Indentation. Irving H. Cowdrey, 559. Discussion 571.
Mechanical Testing of Aircraft Materials. J. B. Johnson, 119. Discussion, 200.
The Effect of Additions of Small Percentages of Nickel to a Copper-Tin Bronze. Clair Upthegrove, G. Wilson and F. N. Rhines, 512. Discussion, 520.
The Significance of Hardness Values for Some Copper-Zinc Alloys. C. H. Davis and E. L. Munson, 522. Discussion, 529.

Haydite Concrete.
Tests of Plain and Reinforced Haydite Concrete. F. E. Richart and V. P. Jensen, 674. Discussion, 694.

Heat Transmission.
Thermal Transmission of Fabrics, Ephraim Freedman, 1025. Discussion, 1035.

Heat Treatment.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
The New Manganese Alloy Steels. E. E. Thum, 215. Discussion, 237.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Hiding Power.
A Discussion of Hiding Power and Its Measurement. G. F. A. Stutz, Jr., and G. S. Haslam, 884. Discussion, 903.
Hiding Power Measurements in Theory and Application. A. H. Pfund, 878. Discussion, 903.
Hiding Power and Tinting Strength of White Pigments. R. L. Hallett, 895. Discussion, 903.
A Practical Brush-Out Test for Hiding Power of Paints. H. A. Gardner, G. G. Sward and S. A. Levy, 891. Discussion, 903.

Hydration.
The Rate of Hydration of Cement Clinker: Part II—Portland Cement at Nine and Twelve Months; Part III—Three Minerals Found in Portland Cement. F. O. Anderegg and D. S. Hubbell, 572. Discussion, 579.

I

Immersion Tests.
See **Corrosion.**

Impact Testing.
Mechanical Testing of Aircraft Materials. J. B. Johnson, 119. Discussion, 200.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Impregnating Compounds.
Rosin in Cable Impregnating Compounds. J. P. Millwood, 828. Discussion, 849.

Indentation.
Hardness by Mutual Indentation. Irving H. Cowdrey, 559. Discussion, 571.

Insecticides.
The Use of Rosin in Insecticides and Disinfectants. R. C. Roark, 832. Discussion, 850.

Instruments.
See **Testing Apparatus.**

Insulating Materials.
The Testing of Condenser Paper. F. L. Roman, 1012.

Iron.
Ferrous Metals Used in Airplane Construction. J. B. Johnson, 28. Discussion, 171.
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.
The Effect of Under-Stressing on Cast Iron and Open-Hearth Iron. J. B. Kommers, 368. Discussion, 382.

J

Joints.
See also **Welding.**
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
Silver Solders. R. H. Leach, 493. Discussion, 509.

L

Lacquer.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.
Lead.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.
Light Alloys.
See **Alloys; Aluminum; Magnesium.**
Linoleum.
Rosin as a Linoleum Component. M. K. Bare, 803. Discussion, 845.

M

Magnesium.
Development of Zinc-Base Die-Casting Alloys. D. L. Colwell, 473. Discussion, 490.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
Structural and Engineering Light Alloys for Aircraft. R. L. Templin, F. V. Hartman and E. C. Hartmann, 34. Discussion, 171.
Magnetic Strain Gage.
A Magnetic Strain Gage. J. Paul Shamberger, 1041. Discussion, 1048.
Magnetic Testing.
The Unbalanced Alternating Current Bridge for Magnetic Analysis. W. B. Kouwenhoven and A. C. Seletzky, 298. Discussion, 312.
Manganese Steel.
The New Manganese Alloy Steels. E. E. Thum, 215. Discussion, 237.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.
Mayari Steel.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.
Merit Factor.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.
Metallography.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.
The Effect of Additions of Small Percentages of Nickel to a Copper-Tin Bronze. Clair Upthegrove, G. Wilson and F. N. Rhines, 512. Discussion, 520.

Metallography (*Continued*):
The Significance of Hardness Values for Some Copper-Zinc Alloys. C. H. Davis and E. L. Munson, 522. Discussion, 529.

Mixing Concrete.
Further Studies on the Workability of Concrete. W. F. Purrington and H. C. Loring, 654. Discussion, 668.

Monel Metal.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.

Mortar.
Discussion on Mortar Specimens, 615.
A Study of Fourteen Brands of Standard Portland Cements and Four Early-Strength Cements. C. H. Scholer and L. H. Koenitzer, 581. Discussion, 594.
The Relation Between the Strengths of Cements Developed by Mortar Specimens and Concrete Specimens. J. R. Dwyer and P. H. Bates, 598. Discussion, 615.

N

Nickel.
The Effect of Additions of Small Percentages of Nickel to a Copper-TinBronze. Clair Upthegrove, G. Wilson and F. N. Rhines, 512. Discussion, 520.

Nickel Steel.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.
The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Nitrided Steel.
A Note on Fatigue Tests of Nitrided Steel. N. L. Mochel, 406.

O

Oils.
A Method for the Determination of the True Acid Value of Oils, Varnishes, Liquid Driers and Soaps. E. W. Diener and S. Werthan, 924.
Rosin and Rosin Oil in Rubber and Reclaimed Rubber. H. A. Winkelmann and E. B. Busenburg, 807. Discussion, 848.
Rosin Used to Produce Rosin Oil. V. E. Grotlisch, 834. Discussion, 851.
The Use of Rosin in Core Oil. Werner G. Smith, 839. Discussion, 851.

P

Paints.
A Discussion of Hiding Power and Its Measurement. G. F. A. Stutz, Jr., and G. S. Haslam, 884. Discussion, 903.

Paints (*Continued*):
Gloss and Its Quantitative Measurement. ... D. Ries and C. B. Gilbert, 911. Discussion, 923.
Hiding Power and Tinting Strength of White Pigments. R. L. Hallett, 895. Discussion, 903.
Hiding Power Measurements in Theory and Application. A. H. Pfund, 878. Discussion, 903.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.
Paint Failure Diagnosis. Robert Job, 871.
A Practical Brush-Out Test for Hiding Power of Paints. H. A. Gardner, G. G. Sward and S. A. Levy, 891. Discussion, 903.
Procedure Used by the Forest Products Laboratory for Evaluating Paint Service on Wood. F. L. Browne, 852.
Rosin in Paints and Varnishes. F. W. Hopkins, 798. Discussion, 843.

Paper.
The Testing of Condenser Paper. F. L. Roman, 1012.

Parachute Fabric.
Aeronautical Textiles. W. E. Emley, 58.

Photo-Elastic Testing.
Photo-Elastic Studies of Aircraft Parts. T. H. Frost, 150. Discussion, 200.

Pigments.
Hiding Power Measurements in Theory and Application. A. H. Pfund, 878. Discussion, 903.
Hiding Power and Tinting Strength of White Pigments. R. L. Hallett, 895. Discussion, 903.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.

Porosity.
The Testing of Condenser Paper. F. L. Roman, 1012.

Portland Cement.
See **Cement.**

Protective Coatings.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.
A Discussion of Hiding Power and Its Measurement. G. F. A. Stutz, Jr., and G. S. Haslam, 884. Discussion, 903.
Gloss and Its Quantitative Measurement. E. D. Ries and C. B. Gilbert, 911. Discussion, 923.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.
Paint Failure Diagnosis. Robert Job, 871.
A Practical Brush-Out Test for Hiding Power of Paints. H. A. Gardner, G. G. Sward and S. A. Levy, 891. Discussion, 903.
Procedure Used by the Forest Products Laboratory for Evaluating Paint Service on Wood. F. L. Browne, 852.
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.

Q

Quality Factor.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

R

Reinforced Concrete.
See **Concrete.**

Riveting.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.

Rockwell Hardness.
See **Hardness Testing.**

Roofing.
Strength Tests on Roof Tiles. Norman W. Kelch, 783.

Rosin.
Symposium on Rosin:
Introduction. F. P. Veitch, 794.
Rosin in the Manufacture of Rosin Esters. Stephen Babcock, 795.
Rosin in Paints and Varnishes. F. W. Hopkins, 798.
Rosin as a Linoleum Component. M. K. Bare, 803.
Rosin and Rosin Oil in Rubber and Reclaimed Rubber. H. A. Winkelmann and E. B. Busenburg, 807.
Rosin in Cable Impregnating Compounds. J. P. Millwood, 828.
The Use of Rosin in Insecticides and Disinfectants. R. C. Roark, 832.
Rosin Used to Produce Rosin Oil. V. E. Grotlisch, 834.
The Use of Rosin in Core Oil. Werner G. Smith, 839.
Discussion on Rosin, 842.

Rubber.
Laboratory Flexing Tests as an Aid in Investigating the Pneumatic Tire Carcass. H. A. Depew and H. C. Jones, 965. Discussion, 976.
Rosin and Rosin Oil in Rubber and Reclaimed Rubber. H. A. Winkelmann and E. B. Busenburg, 807. Discussion, 848.
Service Tests on Rubber Belts. E. G. Kimmich, 957. Discussion, 964.
Stretch in Rubber Transmission Belting. C. W. Staacke, 944.
A Study of the Performance Characteristics of a 4-inch 4-ply Rubber Transmission Belt. J. E. Skane, 928. Discussion, 941.

S

Sand.
See **Aggregates.**

Shear.
Mechanical Testing of Aircraft Materials. J. B. Johnson, 119. Discussion, 200.
Specimens for Torsion Tests of Metals. R. L. Templin and R. L. Moore, 534. Discussion, 544.

Sherardizing.
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.

Silicon Steel.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Soap.
A Method for the Determination of the True Acid Value of Oils, Varnishes, Liquid Driers and Soaps. E. S. Diener and S. Werthan, 924.

Solder.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
Silver Solders. R. H. Leach, 493. Discussion, 509.

Spray Tests.
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.

Springs.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.
The Effect of Temperature upon the Torsional Modulus of Spring Materials. F. P. Zimmerli, W. P. Wood and G. D. Wilson, 350. Discussion, 361.

Stainless Steel.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.
The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr. 411. Discussion, 445.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Stampings.
Applications of Stampings, Forgings and Castings in Aircraft Construction. H. G. Runde, 77. Discussion, 192.

Starting Temperature.
Motor Performance as Determined by Fuel Volatility. George Granger Brown, 979. Discussion, 1005.

Statistical Analysis.
A Study of the Error of Averages and Its Application to Corrosion Tests. C. H. Humes, R. F. Passano and Anson Hayes, 448.

Steel.
Corrosion-Prevention Methods as Applied in Aircraft Construction. H. S. Rawdon, 61. Discussion, 184.
Discussion on Torsional Modulus of Steel, 361.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.

Steel (*Continued*):
Ferrous Metals Used in Airplane Construction. J. B. Johnson, 28. Discussion, 171.
Heat Treatment of Aircraft Parts. Horace C. Knerr, 154. Discussion, 212.
Investigation of Cold-Drawn Bridge Wire. L. S. Moisseiff, 313. Discussion, 348.
Materials of Construction in Aircraft Engines. R. R. Moore, 88. Discussion, 194.
Metal Joints in Aircraft Construction. T. Watson Downes, 127. Discussion, 206.
A Note on Fatigue Tests of Nitrided Steel. N. L. Mochel, 406.
Notes on Aircraft Finishes. H. A. Gardner, 68. Discussion, 184.
Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Normal B. Pilling, 278. Discussion, 291.
Some Observations on the Outdoor Atmospheric Corrosion of Protective Zinc Coatings. C. L. Hippensteel, C. W. Borgmann and F. F. Farnsworth, 456. Discussion, 471.
Specifications and Materials Control. H. A. Backus, 109. Discussion, 200.
The Effect of Temperature upon the Torsional Modulus of Spring Materials. F. P. Zimmerli, W. P. Wood and G. D. Wilson, 350. Discussion, 361.
The Effect of Under-Stressing on Cast Iron and Open-Hearth Iron. J. B. Kommers, 368. Discussion, 382.
The Highly-Alloyed Steels in Aircraft Construction. Jerome Strauss, 41. Discussion, 171.
The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.
The New Manganese Alloy Steels. E. E. Thum, 215. Discusion, 237.
The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Stone.
See **Aggregates.**

Strain Gage.
A Magnetic Strain Gage. J. Paul Shamberger, 1041. Discussion, 1048.

Stress Analysis.
Elastic Behavior of Spring Materials. M. F. Sayre, 546.
A Magnetic Strain Gage. J. Paul Shamberger, 1041. Discussion, 1048.
Photo-Elastic Studies of Aircraft Parts. T. H. Frost, 150. Discussion, 200.
The Effect of Under-Stressing on Cast Iron and Open-Hearth Iron. J. B. Kommers, 368. Discussion, 382.

Sulfate Water, Effect of.
Strength and Resistance to Sulfate Waters of Concrete Cured in Water Vapor at Temperatures Between 100 and 350° F. Dalton G. Miller, 636.

T

Telephone Cable.
Fatigue Studies of Telephone Cable Sheath Alloys. J. R. Townsend and C. H. Greenall, 395. Discussion, 403.

Temperature, Effect of.

Strength and Resistance to Sulfate Waters of Concrete Cured in Water Vapor at Temperatures Between 100 and 350° F. Dalton G. Miller, 636.

The Effect of Temperature upon the Torsional Modulus of Spring Materials. F. P. Zimmerli, W. P. Wood and G. D. Wilson, 350. Discussion, 361.

Tension Testing.

Elastic Behavior of Spring Materials. M. F. Sayre, 546.

Investigation of Cold-Drawn Bridge Wire. L. S. Moisseiff, 313. Discussion, 348.

Mechanical Testing of Aircraft Materials. J. B. Johnson, 119. Discussion, 200.

Metal Joints in Aircraft Construction. T. Watson Downes. 127. Discussion, 206.

Service Tests on Rubber Belts. E. G. Kimmich, 957. Discussion, 964.

Some Effects of Nickel Content in Austenitic Iron-Chromium-Nickel Alloys. Norman B. Pilling, 278. Discussion, 291.

Stretch in Rubber Transmission Belting. C. W. Staacke, 944.

The Effect of Under-Stressing on Cast Iron and Open-Hearth Iron. J. B. Kommers, 368. Discussion, 382.

The Influence of Stress Range and Cycle Frequency on Corrosion. D. J. McAdam, Jr., 411. Discussion, 445.

The Relation Between the Strengths of Cements Developed by Mortar Specimens and Concrete Specimens. J. R. Dwyer and P. H. Bates, 598. Discussion, 615.

The Relative Merits of Some Different Alloy Steels with Respect to Certain Mechanical Properties. Bradley Stoughton and Wilber E. Harvey, 241. Discussion, 258.

Testing Apparatus.

Color and Its Measurement. Edgar Marburg Lecture. C. E. Kenneth Mees, 9.

Gloss and Its Quantitative Measurement. E. D. Ries and C. B. Gilbert, 911. Discussion, 923.

Hiding Power Measurements in Theory and Application. A. H. Pfund, 878. Discussion, 903.

Investigation of Cold-Drawn Bridge Wire. L. S. Moisseiff, 313. Discussion, 348.

Laboratory Flexing Tests as an Aid in Investigating the Pneumatic Tire Carcass. H. A. Depew and H. C. Jones, 965. Discussion, 976.

A Magnetic Strain Gage. J. Paul Shamberger, 1041. Discussion, 1048.
